

A woman and a man are riding bicycles on a paved path through a forest. The woman is in the foreground, wearing a black long-sleeved shirt, black shorts, a black helmet, and sunglasses. She is riding a black and orange bicycle. The man is behind her, wearing a black long-sleeved shirt, black shorts, a white helmet, and sunglasses. He is riding a black and white bicycle. The background is a dense forest with tall trees and a path that curves to the right. The overall tone is professional and active.

CATALOGUE

The KROSS logo features a stylized red double arrow pointing to the left, followed by the word "KROSS" in a bold, white, sans-serif font.

KROSS
YOU CAN DO EVERYTHING

Due to the complex nature of the manufacturing process and variable conditions of components delivery, technical specifications are subject to change during the season. Specifications presented here in are valid as of the date of publication, that is December 2025. Information included in the catalogue shall not constitute an offer, as defined in art. 66 § 1 of the Polish Civil Code.

For the latest offer, including product specifications, visit www.kross-europe.eu.

Version 1.0

KROSS
YOU CAN DO EVERYTHING

— 100% KROSS. 100% PASSION.

35 YEARS

BUILT ON SPORTS DNA

We celebrate over 35 years of passion for bicycles and sport. Our history is a journey from a small company to a market leader and one of the most recognizable bicycle brands in Poland. KROSS is not just a manufacturer - it's a brand built by athletes, engineers and cycling enthusiasts, whose heart is in sport.

BIKES

GRAVEL

Do you long to explore new paths away from the beaten track, or can't wait for your next long-distance challenge? Esker is ready for any adventure. Generous tire clearance, modern geometry, and reliable components let you ride longer and more efficiently. Whether you're racing toward the horizon or discovering unknown roads — Esker will be there with you.

CLEARANCE

For maximum comfort, mount wider tyres – up to 50C, both front and rear.

SIMPLE AND EFFICIENT

1x drivetrains mean easier shifting – and with SRAM 1x13 or GRX 1x12, you'll never lack gears.

HIDE ME IN

Use the space in the down tube to store a repair kit or a vest.

MOUNTING POINTS

Ready for the most unpredictable trips that require extra gear.

FULL PROTECTION

Stones can be unforgiving for paint and lightweight carbon frames. Every frame comes equipped with CS and DT protectors.

LET THERE BE LIGHT

The latest generation allows mounting lights on the fork and routing power from the dynamo through the fork and frame.

ESKER RS

THE FASTEST IN THE CATEGORY

KROSS Esker RS is an advanced gravel bike, which was developed with the aim of competing at the highest level in gravel races. This is our the most innovative sport gravel bike.

Aerodynamic design: frame, fork and seatpost of the Esker RS bicycle were specially designed in collaboration with the Łukasiewicz Research Network – Institute of Aviation in Warsaw, to minimize air resistance.

Adjustable geometry: thanks to the flip chip you can optimise geometry to your riding style.

Top components: designed for racing.

ESKER RS

EFFICIENTLY

Optimized frame shapes and profiles reduce aerodynamic drag — giving you more speed, even when riding into the wind.

ICR

Fully hidden cables and housing thanks to the FSA ACR system.

CLEARANCE

Optimal weight/comfort/grip up to 47C (in LONG position).

MOUNTING POINTS

Only where it's needed most — Esker RS bikes are built for gravel racing.

MADE IN POLAND

100% manufactured in Poland at the carbon factory in Przasnysz.

FLIP CHIP

The rear wheel adjustment allows shortening the wheelbase and changing the bike's handling in off-road conditions.

FRAME PROTECTION

The terrain can be unpredictable, which is why every new RS comes equipped with a rubber protector on the down tube and chainstays.

ESKER ALU

CLEARANCE

Optimal balance of weight, comfort and grip up to 45C.

ICR

User-friendly cable routing that allows the use of any stem.

MOUNTING POINTS

In the most critical spots for mounting bags, a rack, or a kickstand.

SIMPLE AND EFFICIENT

1x drivetrains make shifting and gear choice easier when it matters most. Plus, the new CUES systems deliver lasting durability.

STABILITY WITH THRU-AXLES

Both at the front and the rear, it's a significant upgrade over the previous generation.

PROVEN GEOMETRY

The new ESKER 1.0 shares its proven geometry with Generation 2.

ESKER ALU GRADE B

ICR

User-friendly cable routing that allows the use of any stem.

CLEARANCE

Optimal balance of weight, comfort and grip up to 45C.

MOUNTING POINTS

In the most critical spots for mounting bags, a rack, or a kickstand.

SIMPLE AND EFFICIENT

1x drivetrains make shifting and gear choice easier when it matters most. Plus, the new CUES systems deliver lasting durability.

STABILITY WITH THRU-AXLES

Both at the front and the rear, it's a significant upgrade over the previous generation.

PROVEN GEOMETRY

The new ESKER 1.0 shares its proven geometry with Generation 2.

ALLROAD

Built for riders without limits — crafted to bring joy on the road and on premium gravel. Alta is a truly versatile bike, blending the speed of a road bike with the freedom of a gravel bike, delivering comfort and unforgettable rides on any terrain.

ALTA - MORE ROADS, MORE POSSIBILITIES

READY FOR CHALLENGES

Geometry plays a crucial role in both comfort and handling. That's why we chose a balanced geometry that delivers efficiency on climbs and confidence on descents.

CLEAN LOOK

Smooth welds give the frame a clean, premium look, just like high-end carbon models.

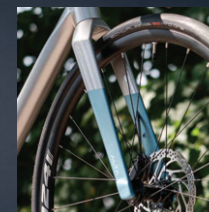

ALL YOU NEED

Alta comes equipped with mounting points for full fenders and top tube bags. It also offers two bottle cage mounts.

CLEARANCE

Clearance for tires up to 40c means even more comfort and confidence when riding on varied surfaces..

CARBON FORK

It not only reduces weight and looks great – its structure helps absorb vibrations without losing stiffness or handling confidence.

CONFIDENT CONTROL

Carefully chosen head tube angles, fork offset, and an extended wheelbase improve stability at higher speeds and on more demanding terrain.

A cyclist wearing a black long-sleeved shirt, black shorts with white lettering, and a black helmet is riding a white mountain bike on a dirt trail through a dark forest. The cyclist is leaning forward in a racing position. The background is filled with tall, thin trees and dense foliage, creating a dark and atmospheric setting. The lighting is dramatic, with some highlights on the ground and the cyclist's bike.

MTB XC

MTB XC bikes are built for speed on the trails — lightweight, efficient on climbs, and precise on descents. The Level alu line is versatile and beginner-friendly, while the Level RS delivers advanced engineering for pure speed and racing performance in XC and MTB marathons.

LEVEL RS - PRECISION, CONTROL AND ALL-DAY PERFORMANCE

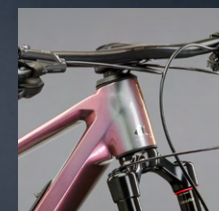

CURVED SS

Curved and dropped seatstays effectively absorb vibrations, increasing comfort.

HIDE ME IN

Use the space in the down tube to store a repair kit or a vest.

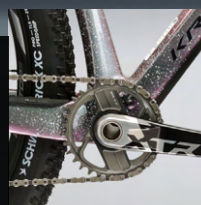

MAKE IT YOURS

Now you can influence the bike's geometry — set the headset cups in the right position to adjust the head angle by -0.6° or $+0.6^\circ$

PROTECTING WHAT MATTERS

The Level is equipped with a full set of flexible protectors placed in key areas — the down tube and chainstay.

LEVEL ALU - READY, WHEN YOU EXPECT MORE

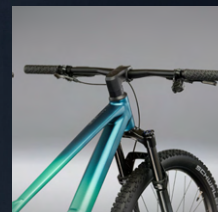

MADE FOR THE TRAILS

Built for fun and efficient riding – now two worlds, Cross Country and Trail, in one bike.

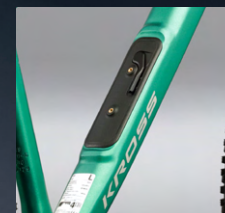

DNA

Using the latest aluminium frame technology, we've recreated frame shapes that rival the carbon version.

HIDE ME IN

Use the space in the down tube to store a repair kit or a vest.

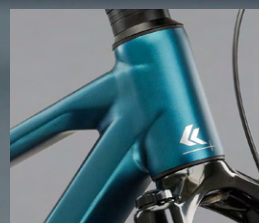

AND... FOR RECREATION

Optional mounts for a rack or kickstand – more functionality for every ride.

ADJUST TO YOURSELF

Do you enjoy fine-tuning your setup? Perfect. With special cups in the head tube, you can adjust the head angle by $+0.6^\circ$ or -0.6° .

LEVEL X100-X300 - READY TO EXPLORE

MOUNTING POINTS

No storage compartment, but plenty of mounting points - from top tube bags to locks, bottles, a kickstand, or a rack.

ICR

Featured even in our entry-level models. A simple, future-proof solution that lets you use any stem you choose.

ON THE TRAILS

With progressive geometry and 120 mm of travel, it's ready to take on any trail with confidence.

SIMPLE AND EFFICIENT

With 1x drivetrains, shifting gears and selecting the right ratio becomes much easier. Thanks to the wide range of the latest Shimano cassettes, you'll be able to climb any hill.

DNA

Sports is in our DNA - that's why we design every bike to look dynamic, even when it's standing still. It has to be a pleasure to the eye.

e-ACTIVE

OFF-ROAD and SUV are new categories in the KROSS portfolio – built for everyday use, designed for adventure, and optimized for user comfort and ergonomic performance.

In this new category, we've partnered with Bosch and Bafang – two trusted leaders in e-bike systems – to give riders exactly what they need: powerful and reliable motor support, long range for all-day adventures, personalized riding modes for full control, and peace of mind thanks to strong after-sales service.

INFLUX **BOSCH**

READY FOR CHALLENGES

SUV versions come equipped with a range of accessories that make everyday use easier.

UNIVERSAL

Thanks to its optimized geometry, it offers riding pleasure both for leisure and for more sporty rides.

MODERN DRIVETRAINS

The entire Influx series is equipped with durable and modern drivetrains, ranging from Shimano Cues to Sram Transmission AXS.

EVERYTHING UNDER CONTROL

With the latest BOSCH solutions, you can control almost every parameter of the bike directly from the display or a smartphone app.

CX/PX

The latest units with powerful support that you will appreciate in challenging terrain.

ABS by BOSCH

Better braking for safer, faster rides.

BOSCH EBIKE FLOW APP – UNLOCK THE FULL POTENTIAL OF YOUR RIDE

Custom Ride Modes. Adjust support, torque, speed, and dynamics to match your riding style.

Over-the-Air Updates. Keep your eBike up to date with new features – no dealer visit needed.

eBike Lock. Use your smartphone or display as a digital key for secure, hands-free locking.

eBike Alarm (Flow+ feature). Get motion alerts and GPS tracking to protect your eBike from theft.

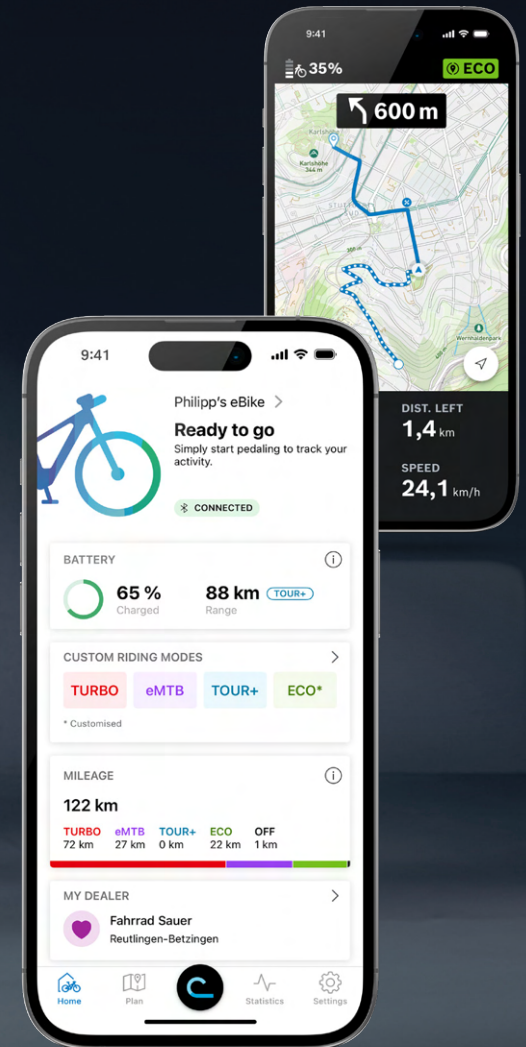

Multi-Bike Management. Manage up to 6 eBikes from one account – ideal for families or fleets.

Digital Service Book. Track maintenance history synced by your Bosch dealer.

Smart Navigation. Plan routes, see elevation data, and import GPX tracks or komoot routes.

CO₂ Tracking. See how much carbon you save by riding instead of driving.

Flow+ Subscription. Unlock premium features and future upgrades – free trial included.

BOSCH PERFORMANCE LINE CX – POWERTUBE 600/800 WH

Power that makes a difference. With a maximum torque up to 100 Nm (updated with Ebike Flow app), enjoy dynamic and natural pedal assistance even on the steepest climbs.

Range tailored to your ride. Choose between a 600 Wh or 800 Wh battery based on your riding style – whether it's quick rides or all-day adventures without worrying about recharging.

Smart support on every kilometer. The system automatically adjusts assistance to the terrain and conditions, ensuring a smooth ride with minimal effort.

Display options: Purion 200, Kiox 300 and Kiox 500. Opt for the minimalist and intuitive Purion 200, or the advanced Kiox 300 with a color screen, Bluetooth, and training features – always stay fully in control.

Top model equipped with ABS and ConnectModule. Experience enhanced safety with the integrated ABS braking system and stay connected with the ConnectModule for real-time data and remote features.

Seamless integration with the eBike Flow app. Customize your riding modes, plan routes, secure your bike with eBike Lock, and update your system wirelessly.

Exceptional durability and reliability. Designed for intensive use, the Bosch CX system performs flawlessly in all weather and terrain conditions.

BOSCH PERFORMANCE LINE PX – POWERTUBE 600/800 WH

More Power. More Adventure. With 90 Nm of torque and up to 700 W of peak power, the Bosch Performance Line PX gives you the boost to conquer steep climbs, rough trails, and long-distance tours — effortlessly.

Smart Riding, Made Simple. Auto mode adjusts support in real time — whether you're facing a hill or a sudden headwind. You ride relaxed, the system does the thinking.

Explore Further with Confidence. Paired with the PowerTube 600 or 800, this system delivers long range and premium integration — giving you the freedom to ride farther, for longer.

Quiet Strength. Thanks to its optimized gear concept, the PX motor delivers powerful support with minimal noise — so you can enjoy the sounds of nature, not your bike.

Your Ride, Your Way. Customize your assist levels, track your stats, and secure your bike with eBike Lock — all through the intuitive eBike Flow app.

Built to Last, Designed for Every Adventure. Engineered for trekking and off-road challenges, this robust system performs in all conditions — rain, mud, or heavy luggage included.

BAFANG M410 + BMZ V10 720/820 WH

Reliable and powerful support: The M410 motor delivers smooth, consistent assistance with 250W power and 80Nm torque, making climbs easier and rides more enjoyable.

Extended range freedom: With BMZ V10 batteries available in 720Wh and 820Wh, riders can explore longer distances without frequent recharging.

Enhanced safety and convenience: The DP C245.CAN display's ambient light sensor automatically activates lights in low light, improving visibility without hassle.

Always connected and customizable: App connectivity via Bafang GO allows riders to personalize assist modes, navigate routes, track performance, and keep the system updated effortlessly.

User-friendly controls: Easy assist level selection and walk mode support make uphill pushes and changing conditions simple and comfortable.

On-the-go phone charging: USB-C port on the display keeps your devices powered throughout your ride.

e-SPORT

Dynamics riding on forest singletracks, supported by a powerful motor. With bikes from the e-Sport category, your dream becomes reality. A touch of extra energy assists on every climb and lets you ride longer in demanding terrain, while modern bikes give you full control and speed without sacrificing the joy of riding.

GRIST **BOOST** E-MTB FS

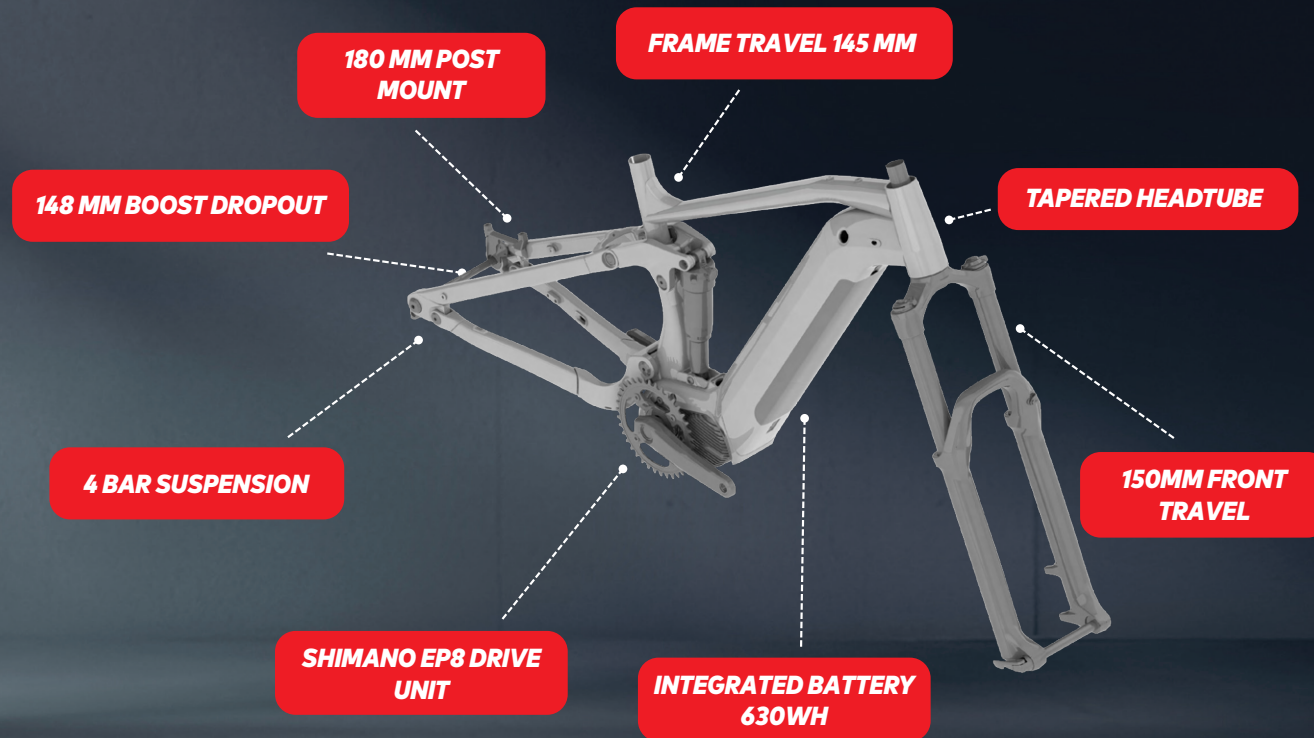

Stable and agile handling. Modern geometry provides confidence on technical singletracks and smooth control on fast descents.

Durable lightweight frame. Alloy alloy construction ensures long-lasting strength without adding unnecessary weight.

Smooth and efficient suspension. The 4-bar system with 140 mm travel absorbs bumps and rough terrain, delivering a comfortable ride all day long.

Balanced and clean design. Integrated battery keeps weight low and centered, improving bike stability and overall ride feel.

Reliable performance in varied conditions. Robust frame construction designed to withstand tough trails and adventurous riding.

MOON BOOST

A black Kross Moon Boost 1.0 e-bike is shown from a side profile, parked on a dirt trail. The bike features a full suspension system, including a front fork and a rear shock absorber. The frame is black with 'KROSS' written on the down tube. The bike has large, knobby tires and a rear rack. The background is a blurred forest scene with trees and foliage. A semi-transparent dark blue triangle is overlaid on the right side of the image, partially covering the bike and the background.

Our constantly refreshed line of full suspension e-bikes is made for anyone who loves hitting the mountains. With BOOST assistance that features our bikes, you'll be able to reach all the spots you've been dreaming of. MOON BOOST 1.0 – this pure enduro beast comes with an integrated lift system powered by the Shimano EP801 motor. Test it on gnarly mountain sections with the latest RockShox VIVID and ZEB suspension, and feel how nimble it is on climbs and in the air, thanks to its dialed geometry and lightweight carbon frame.

E-SPORT

2.0-inch OLED touchscreen with integrated ambient light sensor

Built-in **Bluetooth and ANT**
+ (support hr monitor and action camera, etc.)

Anti-Theft based on integrated **GNSS** and **4G** network

Parameter settings and data monitoring via APP

65W Type-C fast charging output

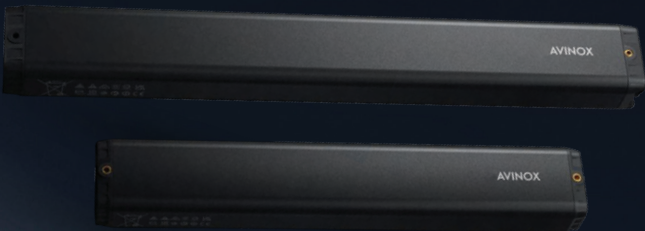

- The smart system
- Max. 120 Nm
- Max. 1000 W Peak Power
- Max. 400%
- Approx. 2,8 kg

- Wireless connection provides a neat cockpit
- Four buttons, the right controller supports user customization
- Great haptic feedback from buttons
- Long battery life (approx **1 year**)

BATTERY 600/800wh

- 20 Wh 21700 cells
- High energy density
- A compact cross-section allows for a slimmer frame design
- 600 Wh is shorter and supports a removable design
- Fast charging support (0.5 C)
- 500 cycles remain 80 % initial capacity

DUST BOOST - PURE POWER

COMMUNICATION

A clear OLED display, visible in all conditions, allows full parameter customization thanks to smartphone app connectivity.

GEOMETRY

The new DNA is modern trail geometry. Stable on descents, agile in corners – adding confidence on every route.

COMFORT AND CONTROL

A 130 mm travel suspension fork makes roots and bumps no obstacle. You ride with confidence, maintaining grip in every situation.

DJI AVINOX

It responds instantly and delivers powerful torque – making climbs feel flat.

800WH POWER

A powerful removable battery gives you all the range you need – no worries, just ride.

MODERN

Integrated cables, an in-frame battery, and refined details make the DUST BOOST look as good as it rides.

A man and a child are riding bicycles in front of a wall covered in colorful graffiti. The man, on the left, is wearing a white t-shirt, black shorts, and a black helmet. He is riding a white bicycle with 'KROSS' written on the frame. The child, on the right, is also wearing a white t-shirt, black shorts, and a black helmet. He is riding an orange bicycle with 'KROSS' written on the frame. The background is a wall with various graffiti, including a large, stylized face. The image is split into two sections by a diagonal line. The left section is darker and features the 'JR/KID' logo. The right section is lighter and shows the child riding the orange bicycle.

JR/KID

Bikes from the Junior and Kid series are a step into the world of two-wheeled fun. Tailored to children's needs, they make every ride full of joy and safety.

FREEDOM

It requires confidence that goes hand in hand with a child's imagination. The right geometry and components make it possible to enjoy both descents and climbs.

SAFETY

Confident braking thanks to hydraulic brakes that operate smoothly with a clearly defined bite point.

FORK

A lightweight alloy fork reduces the weight at the front of the bike, resulting in improved handling.

1X DRIVETRAIN

Simplicity and low weight - the best way to start the cycling adventure.

WIDE TIRES

It's not just exceptional grip, but also the comfort provided by high-volume tires.

LIFTIE

COMFORT

It's the riding confidence of young cyclist's and their desire to take on new challenges.

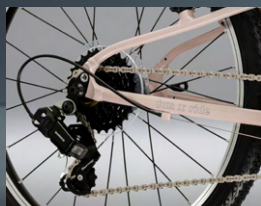

EFFECTIVE

And lightweight V-brake brakes provide full control of the bike with minimal effort.

ERGONOMICS

Lets you enjoy the ride and be free from negative emotions.

RIGID AND LIGHT

ALUMINIUM frameset manufactured with monocoque technology ensures precise handling and low weight.

LOW WEIGHT

For bikes, it means faster learning and an even better riding experience.

A low-angle, upward-looking shot of a mountain biker in mid-air, jumping over a forest canopy. The rider is wearing a helmet and dark clothing. The background is a dense forest of tall, thin trees with sunlight filtering through the leaves. A large, semi-transparent white 'X' shape is overlaid on the image, centered on the rider.

DIRT

Made to maximize the fun of carefree bike adventures.

SPADE - FUN, PUMP, JUMP!

DURABLE CONSTRUCTION

A frame built from alloy and tested with a focus on increased durability, which is key in this category.

AVAILABLE IN TWO FRAME TYPES

Choose the frame that suits your budget and style – with vertical dropouts for a derailleur or horizontal for single speed.

TWO SIZES

SHORT & LONG allow you to adjust the bike to your style and preferences.

STABLE STEERING

With a tapered head tube for increased stiffness, you can be sure this bike is built for fun.

TRANS

Trans is the ideal choice for those seeking a comfortable, functional, and versatile bike for daily commutes, recreational rides, and longer touring adventures. Thanks to its versatility and practicality, Trans allows you to discover new places and enjoy riding on a wide various routes.

The new frames with a refreshed shape, design, and colour scheme, featuring internal cable routing and a water bottle mount, also available in the women's version, come equipped with disc brakes that provide not only comfort but also confidence in safe riding and braking.

Geometry: KROSS Trans has a comfortable geometry, ensuring comfort even during long rides and reducing the strain on the spine.

Functionality and practicality: KROSS Trans is equipped with practical utility features such as a rack, mudguards, and lighting.

EVADO

Evado is a series of cross bikes designed to combine efficient riding on a variety of cycle paths and asphalt with the ability to handle light off-road terrain.

Combining these features results in a bike that will not only excel in urban conditions but also allow for exploration of woodland or gravel terrains.

New frame: our Evado bikes are equipped with a new lightweight frame optimized for comfort.

Tailor it to your needs: the bikes in the Evado range have places to fit mudguards, a rack or lighting, making them suitable for all conditions.

A man and a woman are standing on a cobblestone street in front of a building with stone walls and dark doors. The man, on the left, is wearing a light blue button-down shirt, tan trousers, white sneakers, a black bicycle helmet, and glasses. He is holding a black city bike. The woman, on the right, is wearing a white blazer, orange shorts, white sneakers, a black bicycle helmet, and sunglasses. She is holding a city bike with a rose gold frame. The building behind them has a door with the number '35' and another door with the number '33'.

CITY

City bikes are the essence of comfort, style, and eco-friendly transport in a modern form.

SENTIO / SENTIO CLASSIC

MODERN AND CLASSIC

Sentio blends classic city bike style with modern design, featuring lightweight alloy frames in a retro look.

PURE COMFORT

Enjoy every mile in the city — with comfort and an active riding position.

STYLISH

The rear wheel adjustment allows shortening the wheelbase and changing the bike's handling in off-road conditions.

READY FOR THE CITY

Equipped with everything you need to move around the city safely at any time of day.

e-BIKE

A purple Kross e-bike is shown from a side profile, parked on a paved path. The bike features a black seat, handlebars, and tires. The frame is purple with 'KROSS' written in orange on the down tube. The tires are black with 'MIKE BEAR' written on the sidewall. The background is a dark, textured wall of reeds or grass. A large, semi-transparent white circle is overlaid on the right side of the image, partially covering the bike and the background.

These bikes are made for those who want to go further, ride easier, and enjoy every moment. They combine power and lightness to make every route a pleasure – from city streets to forest trails. Their design and technology work with you, not for you, creating a natural and confident riding experience. A true everyday companion that lets you explore more – effortlessly, without limits, and with the pure joy of every ride.

A man wearing a tan uniform, a black helmet, and sunglasses is riding a black cargo bike. The bike is loaded with several large cardboard boxes and a basket of fresh produce, including bread and vegetables. The background features a dark, slatted wall and some greenery. The word "e-CARGO" is overlaid on the left side of the image in a large, bold, white font, with the "e" in blue.

e-CARGO

The LongJohn Cargo Bike is our first transport bike designed to handle large loads while prioritising environmental and personal health benefits.

Customisable with a variety of configuration options, it can be tailored for specific needs, whether as a work tool, a family transport solution, or an eco-friendly alternative to driving in busy urban areas.

COMPONENTS PROTECTORS

NEW

COUNTERTECH PROTECTOR

Manufactured with the use of the Counter Tech® technology to ensure perfect frame protection from chain damage.

SPECIFICATION

DIMENSIONS 23.3 x 2,5 CM

REFERENCE NUMBER

T4CIN000028

CHAINSTAY PROTECTOR

Chainstay protection made of thick neoprene. Protects the rear fork tube from damage.

SPECIFICATION

DIMENSIONS 105 x 115 MM

REFERENCE NUMBER

T4CIN000006

CHAINSTAY PROTECTOR LEVEL 10-TE

Chainstay protector for LEVEL 10.0, 11.0, 12.0, 13.0 14.0 15.0 and TE models. Manufactured with the use of the Counter Tech® technology to ensure perfect frame protection from chain damage.

SPECIFICATION

DIMENSIONS 28.5 CM x 2.3 CM

REFERENCE NUMBER

T4CIN000005

Due to the complex nature of the manufacturing process and variable conditions of components delivery, technical specifications are subject to change during the season. Specifications presented here in are valid as of the date of publication, that is December 2025. Information included in the catalogue shall not constitute an offer, as defined in art. 66 § 1 of the Polish Civil Code.
